The screenshot shows the Disk Drill application window. At the top, there is a user profile icon, the title 'Disk Drill', and navigation buttons: 'BACK', 'RESUME', 'SAVE SESSION', and a settings gear. On the right are window control buttons. Below the title bar, a status bar indicates 'Deep Scan: Macintosh HD, 260 recoverable Items found' and a progress indicator '~1m elapsed / 9 m left'. A blue bar below that shows 'Recover to: ~/Desktop/Recovered' and a 'RECOVER' button. The main area is divided into a left sidebar with a search box and a list of file categories, and a main pane showing a tree view of scan results. The tree view shows folders like 'Reconstructed files (2973)', 'Recovery Vault (4394)', 'Users (4394)', 'Public (2)', 'admin (4392)', and 'AppData (4392)'. The 'Users' folder is expanded to show 'GMapTool.link' and 'VMware Shared' shortcuts. A table at the bottom right of the main pane lists items with columns for 'Last Modified', 'Size', and 'Type'.
